PROFESSIONAL SUMMARY

Driven Computer Science student with a robust foundation in data analysis, SQL, Python, and dashboard development using Power BI and Excel. Completed the Google Data Analytics Certificate, demonstrating a strong aptitude for interpreting complex datasets, identifying key trends, and delivering actionable insights. Eager to leverage analytical skills and a passion for data to contribute effectively to an entry-level Data Analyst role.

SKILLS

- Data Analysis: SQL, Python (Pandas, NumPy), Excel (PivotTables, VLOOKUP), Power BI
- Database Management: SQL (Queries, Joins, Aggregations)
- Data Visualization: Power BI, Excel Dashboards
- Programming: Python
- Tools: Microsoft Office Suite, Google Workspace

EDUCATION

Bachelor of Science in Computer Science

XYZ University

PROJECTS

Sales Dashboard

202X

- Analyzed extensive sales datasets using SQL and Excel to uncover critical trends, identify top-performing products, and pinpoint sales bottlenecks.
- Designed and developed an interactive Sales Dashboard in Power BI, visualizing key performance indicators (KPIs) such as revenue, sales volume, and regional performance.
- Presented actionable insights and data-driven recommendations that identified opportunities for a projected 20% gain in sales efficiency.
