PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Computer Science student (expected 2026) equipped with a Google Data Analytics Certificate and strong proficiency in SQL, Python, Excel, and Power BI. Eager to leverage analytical skills and dashboard creation expertise to extract actionable insights, visualize complex data, and contribute to data-driven decision-making in an entry-level Data Analyst role.

SKILLS

- Programming Languages: Python (Pandas, NumPy)
- Database: SQL (PostgreSQL, MySQL basics)
- Data Visualization: Power BI, Excel
- Tools: Microsoft Excel, Google Sheets, Jupyter Notebook, VS Code

EDUCATION

Bachelor of Science in Computer Science

XYZ University

PROJECTS

Sales Performance Dashboard

202X

- Developed an interactive Sales Performance Dashboard using Power BI to visualize key sales trends and metrics from raw transactional data.
- Utilized SQL for data extraction, cleaning, and transformation, identifying top-performing products and regional sales patterns.
- Discovered critical insights into customer purchasing behavior, leading to a proposed strategy for optimizing inventory and marketing efforts, projected to potentially increase sales efficiency by 20%.
